

Fruit Kebobs with Chocolate Drizzle

Circle the fruit available for your lab:

- 1 apple
- 1 banana
- 1 orange
- 1 pear
- bunch grapes
- 1/6 pineapple
- 1/6 melon
- 4 strawberries

2 Tbsp chocolate chips melted with 2 tsp butter

1. Rub wooden skewers over each other to remove any splinters.
 2. Wash fruit in colander under cold water. Dry with paper towel.
 3. Set up two cutting boards with pie plates to collect food waste.
 4. Each student will prepare one fruit for the group. Fruit pieces should be about 1" (2cm).
 5. Divide fruit fairly according to taste and amounts available. Each student will assemble fruit kebob according to their taste. Place kebob on a folded paper towel.
 6. Melt the chocolate & butter in the microwave – 15 seconds & stir then 10 seconds & stir (if needed 5 seconds & stir). Use a spoon to drizzle chocolate on kebobs.
 7. Set kebobs on the table while all group members do the clean-up. **IF CLEAN UP IS FINISHED & CHECKED BEFORE THE BELL** you may eat your kebob in class.
